U.S. E.P.A., REGION V,  
WASTE MANAGEMENT DIVISION  
OFFICE OF THE DIRECTOR

Re: Fields Brook

Dear Mr. Constantelos:

SCM Corporation hereby requests an additional extension of time within which to respond to EPA's May 16, 1986 request for information.

SCM submitted its initial response to EPA on June 20, 1986. In that response, SCM answered most of EPA's questions and submitted 639 pages of documents. On June 25, SCM supplemented that response by submitting almost 900 pages of additional documents. Since that time, SCM has continued to work on finalizing its response but has not been able to complete those efforts by August 15, which is the date of the previously requested extension.

On July 3 EPA issued its draft Feasibility Study for the sediment removal of Fields Brook. The comment period on that Feasibility Study is also closing on August 15.

Since essentially the same personnel who are preparing the response to the request for information are also reviewing and commenting on the Feasibility Study, it has not been possible for SCM to do both within a short period of time. Therefore, SCM is requesting a further extension of time until September 12 within which to finalize its response to EPA's request for information.

Since EPA staff will be reviewing comments on the Feasibility Study and responding to those comments during the next several weeks we believe that this additional extension will not delay EPA's work.
